Personal Profile

I'm a Full Stack Web Developer living in Atlanta, GA. I graduated my bachelor's degree with a major in Engineering. I spent the last three years working as automation tester with programming language like java and javascript. As of now I am attending DigitalCrafts' six month, partime flex coding bootcamp and persuing a new challenge as full stack developer.

Featured Projects

Recipe App

June 2020

- liveSite: <https://react-recipe-app-xi.vercel.app/>
- Its an individual challenge building a recipe website to allow the user can add their own recipes or can fetch recipes from API and store for later use
- responsibilities included managing states in react/redux and making action respond to the correct component
- Built in with React/Redux, React router, js and bootstrap

Trip App

May 2020

- liveSite: <https://tripapp-project.herokuapp.com/login>
- Member of 4-person development team building a trip planner website when the user can add as well as recommend their favourite restaurant and places for feature reference
- responsibilities include identifying the authentication strategy for our login page and wire up postgres database with our front end
- Built in with HTML, CSS, JavaScript, Node.js, PostgreSQL

clear_dark sky

March 2020

- repository: https://github.com/seidoo99/clear_dark-sky-frontend-project
- Member of 5 people development team for building a website which predicts the latest weather in your location as well as locations you want to visit
- My resopnsibilities included fetching data from astronomy API and render the output to the UI
- Built in HTML, CSS, JavaScript, Node.js

Work Experience

Digital crafts full stack bootcamp student

January 2020 - present

- 6 month flex part time web development bootcamp
- Software engineering training course covering full-stack development including, but not limited to JavaScript, Python, including an emphasis on cutting-edge frameworks like React/Redux and server-side technologies including Node.js, Express, and PostgreSQL.

Quality assurance engineer

september 2018 - present

- Perform functional, regression and integration testing of web based, POS and mobile applications involved in testing applications of different platforms such as IOS and android devices
- Created and maintain UI/API automation tests on the Cucumber/Selenium/JavaScript framework for UI automation and mocha/chai/nodeJs framework for API

Automation Tester

september 2017 - August 2018

- Created automation test scripts for the corresponding test cases using selenium Web driver with java.
 - Execute SQL and elastic search queries in the database to conduct data integrity testing by checking the data tables on the server.
-

Key Skills

HTML5/ CSS3

JavaScript

Java

Express

Node.js

PostgresSQL/SQL

React/redux

jQuery
